AMC signed between the company and the customer to allow regular checkups and routine work to keep the performance and quality of the products in good condition. These services are provided for technical support as well as renewal of the software and various other anti viruses. Technical Services has been formulated recently to become a powerful arm to provide practical Support as well as Solutions for Installation, Commissioning and Maintenance activities as well as customer training needs

SECURITY  
Solutions

# SECURITY

---

Security is the degree of protection against danger, damage, loss, and criminal activity. We help customers to protect people, property and assets, optimize processes to improve business efficiency. we offer the possibility for any authorized person to remotely access live images over the network protection against danger, damage, loss, and criminal activity. We help customers to protect people, property and assets, optimize processes to improve business efficiency. we offer the possibility for any authorized person to remotely access live images over the network

## **Firewall Security**

If the aim is to keep the entirety of the structure of your firewall intact, then our managed firewall services are something you require. At the very least, your cybersecurity relies heavily on the kind of protection that we offer our customers. Regardless of your business plan and structure, this is a protection you cannot fully function without, especially as you grow and expand. Even more, it is a lot layered than it is portrayed to be.

With this in mind, we can offer you round the clock monitoring and it's done in real-time too. The best part of this all is that you do not have to busy yourself with the management of your firewall services. Allow the professionals to do all the heavy lifting while you solely focus on growing your business

# SECURITY

---

## Network security solutions

With the increasing reliance on technology, it is becoming more and more important to secure every aspect of online data and information. One of the best ways to secure your data is to make sure your network is protected. THECS, is a leader in security and network acceleration providing trusted enterprise solutions.

# Biometric Solutions

# BIOMETRIC SOLUTIONS

Physical access control is a matter of who, where, and when. An access control system determines who is allowed to enter or exit, where they are allowed to exit or enter, and when they are allowed to enter or exit.

THECS designs and implements different access control systems based on solutions from multiple vendors. These can include standalone card readers up to a complicated networked solutions consisting of tens of cards and biometric readers, door controllers, turnstiles, road blockers and sensors. Whether your organization is large or small, the importance of managing access to your premises cannot be over-emphasized. Therefore at THECS we design our solutions based on the understanding that every organization or company operates differently, and each has individual needs and requirements. A time and attendance system enables an employer to have full control of all employees working hours. It helps control labor costs by reducing over-payments, eliminating manual processes. THECS provide time attendance systems from ZK and Honeywell, Netgear ,other vendors..

Audio & visual  
Solutions

# AUDIO & VISUAL

---

## **CATV and IPTV**

Cable television (CATV) is a system of delivering television programming to paying subscribers via radio frequency (RF) signals transmitted through coaxial cables or light pulses through fiber-optic cables and Internet Protocol television , (IPTV) is a system through which television services are delivered using the Internet protocol suite over LAN or the Internet. THECS provides turnkey, centralized, professional Satellite CATV and IPTV systems using top-of-the-line equipment from industry leading manufactures.

# AUDIO & VISUAL

---

Our audio visual services are widely used in a number of different sectors including education, retail, restaurant & fast food stores (digital menus), business offices and meeting rooms, providing effective solutions for almost every industry. Our service is a complete package; from an in depth consultation to establish your precise needs, installation and complete technical guidance and maintenance, you can rest assured knowing all your AV needs will be taken care of with THECS.

## **Video/Voice Conferencing**

---

Video conferencing (VC) is the conduct of a videoconference by a set of telecommunication technologies which allow two or more locations to communicate by simultaneous two-way video and audio transmissions. With powerful computing processors and video compression techniques, video conferencing has made significant inroads in business, education, medicine and media. By reducing the need to travel, without flying, driving or catching trains, to bring people together the technology also contributes to reductions in carbon emissions, thereby helping to reduce global warming. THECS Business Systems provide a lot of video/audio conferencing solution.

## **Digital Signage**

---

Digital Signage enables your business to deliver your messages onto many different formats of screen, helping you to connect better with your audiences. From inter-business communication to customer targeting content, digital signage has come a long way over the last few years. FAST COMPUTERS works with leading providers on all aspects of digital signage and content management from software, screens and solution through to support, working with you to deliver a seamless digital solution.

# AUDIO & VISUAL

---

## **Video Wall**

---

At THECS, we have a number of video wall solutions available to meet your needs. With a range of configurations from 2x2 - 15x15 to digital content creation, let THECS demonstrate the potential that a video wall can unlock for your business. Why not check out our own in-house video wall to see the possibilities available!

## **Commercial Display Screens**

---

THECS partner with top brands to provide only the highest quality commercial display screens for your business. Whether you require digital signage, commercial TVs, meeting room presentation solutions, customer advertising or data walls, THECS will work closely with you to ensure we deliver the correct size, format, warranty and mounting solutions, transforming your ideas into realistic solutions

## **Interactive Display Screens**

---

Thanks to our comprehensive range of screens available, we offer a number of interactive display solutions, suitable for the education sector, retail (visitor and customer multi-touch kiosks) as well as boardroom and meeting room wall mounted multi-touch screens. By working closely with you to understand your exact requirements, THECS can deliver a complete end-to-end consultative approach, providing you with the right technology to suit your needs. We also offer on-site demonstrations from a wide range of leading manufacturers at our 'Innovation Centre'

# Telephone System Solution

# PBX SYSTEMS

---

A private branch exchange (PBX) is a telephone exchange or switching system that serves a private organization and performs concentration of central office lines or trunks and provides intercommunication between a large number of telephone stations in the organization. An IP PBX handles voice signals under Internet protocol, bringing benefits for computer telephony integration (CTI).

THECS specialized in supply and installation of PBX systems from multi vendors. THECS provides IP telephony solutions of ALCATEL, PANASONIC and AVAYA, Grean Stream , Cisco , And others

# 8

## BMS Solutions

# BMS SOLUTION

---

THECS provides you with a complete building management software solution that is capable of monitoring and controlling all above mentioned systems and even more such as IT related devices like printers, network switches and others into the same building management software. By using Sky-Walker as your building management software you can choose any brand of system or equipment that is provided with a communication port and a communication protocol. Sky-Walker is a pure software solution that is manufacturer independent with the possibility to integrate every system based on standard protocols as well as proprietary protocols.

## **What does our Building Management Software look like**

Our key strength is the customization we offer to each one of our clients. You can determine the complete look and feel of the software, including images, colors and fonts, even in your company style. Furthermore, the icons are customizable with the comprehensive icon library provided by us. The in-house graphics team is also capable of providing tailored and customized icons to best suit your needs.
